9.3 STATUS REPORT OF ACTION SHEET

Attachments: Nil

BACKGROUND

Council at its March 2017 Ordinary Meeting of Council discussed the use of Council's status report and its reporting mechanisms.

Council therefore after discussing this matter agreed to have a monthly item presented to Council regarding the Status Report which provides Council with monthly updates on officers' actions regarding decisions made at Council.

It can also be utilised as a tool to track progress on Capital projects.

STAFF COMMENT

This report has been presented to provide an additional measure for Council to be kept up to date with progress on items presented to Council or that affect Council.

Council can add extra items to this report as they wish.

The concept of the report will be that every action from Council's Ordinary and Special Council Meetings will be placed into the Status Report and only when the action is fully complete can the item be removed from the register. However the item is to be presented to the next Council Meeting shading the item prior to its removal.

This provides Council with an explanation on what has occurred to complete the item and ensure they are happy prior to this being removed from the report.

TEN YEAR FINANCIAL PLAN

There is no direct impact on the long term financial plan.

FINANCIAL IMPLICATIONS

Financial Implications will be applicable depending on the decision of Council. However this will be duly noted in the Agenda Item prepared for this specific action.

STATUTORY IMPLICATIONS

NIL know at this time.

This report has been presented to provide an additional measure for Council to be kept up to date with progress on items presented to Council or that affect Council.

Council can add extra items to this report as they wish.

The concept of the report will be that every action from Council's Ordinary and Special Council Meetings will be placed into the Status Report and only when the action is fully complete can the item be removed from the register. However the item is to be presented to the next Council Meeting shading the item prior to its removal.

This provides Council with an explanation on what has occurred to complete the item and ensure they are happy prior to this being removed from the report.

There is no direct impact on the long term financial plan.

5.69. Minister may allow members disclosing interests to participate etc. in meetings

- (1) If a member has disclosed, under section 5.65, an interest in a matter, the council or the CEO may apply to the Minister to allow the disclosing member to participate in the part of the meeting, and any subsequent meeting, relating to the matter.

BACKGROUND

To seek Council's endorsement for the application of the Shire of Kellerberrin Common Seal in accordance with the Common Seal Register.

A process will be put in place to ensure that this occurs. It is recommended that Council formalises the receipt of the affixation of the Common Seal Report for endorsement.

Generally, the Common Seal is only applied in circumstances where the Council has specifically resolved to enter into an agreement, lease or dispose of or acquire land. There are however, occasions where the Seal is required to be applied urgently and Council's endorsement is sought retrospectively.

Attached to this report is a short list of agreements that require Council endorsement for use of the Common Seal.

1. Fair value of land and buildings and infrastructure assets - frequency of valuations

Finding

The Shire has performed an assessment to determine whether its land and buildings, roads, drainage and footpaths infrastructure assets represent fair value. This assessment has relied on the Shire's internal assessment by management of the current market conditions. Although the high level assessment indicated there could be significant movements or impacts on its land and buildings, roads, drainage and footpaths infrastructure assets, management advised that they are comfortable with the value of the land and buildings and infrastructure assets as at 30 June 2022 and that they did not consider any potential change in fair value to be material.

Rating: Significant

Implication

Without a robust assessment of fair value of Shire's land and buildings and infrastructure assets there is a risk that the fair value of land and buildings and infrastructure assets may not have been assessed adequately and in compliance with *AASB 13 Fair Value Measurement*, as well as Regulation 17A(4)(b) of the Local Government (Financial Management) Regulations 1996 (the Regulations).

Recommendation

The Shire consider implementing as part of the preparation of financial statements a formal robust process to determine whether indicators exist that would trigger a requirement to perform a formal revaluation of land and buildings and infrastructure assets. This process is to ensure that the Shire's land and buildings and infrastructure assets are recorded at fair value in compliance with *AASB 13 Fair Value Measurement* and the Regulations.

This may entail obtaining relevant input from an independent valuer as to whether or not they consider there are any prevailing market factors which may indicate that the fair value of relevant assets are likely to have been impacted to any significant / material extent from the prior year. Where a fair value assessment has been performed internally the Shire may consider having this assessment peer reviewed by an independent valuer to obtain assurance over the valuation methodology applied, inputs and the reasonableness of the valuation model applied.

Management comment

Management have noted the recommendation and will take into consideration prior to preparing the Annual Financial Report for each financial year.

Additional Commentary

This item has been raised with every Council. The advice to Council is that this has been raised due to the inflation rate (CPI) and the fact our assets may be undervalued due to this. However the CPI figure at June 2022 wasn't significant.

2. Variance between purchase order value and invoice value**Finding**

We noted that there were variances of more than 10% between purchase order value and the related invoice value in six out of 24 purchase transactions we tested.

**Rating: Moderate
Implication**

Discrepancies between prices and quantities agreed upon with the supplier and actual prices and quantities charged by the supplier could go undetected resulting in financial losses to the Shire.

Recommendation

Management should raise an amended purchase order properly authorised by the responsible purchasing officer to ensure it aligns with the invoice value if the management concurs with the prices and quantities reflected in the invoice and the explanations for the adjustment.

Management comment

Councils Management feels that making commentary on the bottom of the original purchase order advising as to why the invoice is more than 10% above or below the purchase order and then signing the bottom of the purchase order authorising the invoice for payment would be sufficient.

Responsible person: Manager of Governance

Completion date: 30 June 2022

Additional Commentary

A new process has been put in place, which the auditors have approved. This process has been in operation since the completion of the Interim Audit.

3. Monthly reconciliations**Status in 2022**

Out of a sample of 24 pay periods selected for testing the following was identified:

- there was no evidence that payroll reconciliations had been performed for 10 pay periods
- there was no evidence of a review for four pay periods where a reconciliation had been performed
- for two pay periods where a reconciliation had been performed the reviewer had not indicated the date of review.

Monthly creditor reconciliations were not dated by the reviewer for July 2021 and September 2021 through to February 2022.

Finding in 2021

We noted the following in relation to monthly reconciliations:

- payroll - reconciliation between the payroll reports and the general ledger had not been performed since the new payroll system Altus was introduced in November 2020
- bank – although review sign off was evident it's unclear the date the review took place
- Investments – although review sign off was evident it's unclear the date the review took place.

Rating: Moderate**Implication**

In the absence of monthly reconciliations being performed or evidence to confirm the review was undertaken in a timely manner, posting errors in the general ledger (if any) may not be detected. This could have various consequences including misreporting to Council and in the annual financial report.

Recommendation

Monthly reconciliations should be prepared and reviewed in a timely manner. Evidence to support the timely preparation and review should be documented on the reconciliation.

Management comment 2021

Council's Management acknowledges that the payroll reconciliation hasn't been completed on a fortnightly basis since the operation of a new Payroll system being Altus. It will also acknowledge that this was a formal procedure that occurred every fortnight and has now been re-established with a new formulated spreadsheet for fortnightly processing. The gap was due to ironing out all the issues presented by the new system.

Council acknowledges that no dates were provided adjacent to the signature for the Bank Reconciliations or the Investment Register. This process has now been rectified.

Responsible person: Deputy Chief Executive Officer

Completion date: 30 June 2021

Management comment 2022

This item has been raised with staff and a new reconciliation sheet has been prepared for signing to deal with Management not dating their review of the reconciliation.

Council's Management has met with all staff and requested a new procedure be produced for management review for reconciliations and end of month procedures to alleviate the above occurring again.

Responsible person: Manager of Governance

Completion date: 31 July 2022

Additional Commentary

A new procedure has been implemented and all reconciliations are being completed in a timely manner and are dated for referencing that timeliness.

4. Contract price variations**Status in 2022**

The Shire has since adopted a contract management policy. However, it does not specify the delegation thresholds as recommended.

Finding 2021

We noted that there are no limits on the delegations for entering into contract variations. Paragraph 21A of the Local Government (Functions and General) Regulations 1996, allows local governments to make variations to the original contract price under certain circumstances.

Rating: Moderate
Implication

In the absence of management approved thresholds for variations to contracts, there is a greater risk that contract variations are approved by staff who do not have the necessary skills of knowledge of the contract and could result in the Shire not obtaining value for money.

Recommendation

We recommend that delegation thresholds be established that specify which staff/positions can approve contract variations, based on value and/or the type of contract.

Management comment 2021

New Procurement Policy was recently endorsed by Council. When Council review the delegations register next it will take into consideration the delegation of Contract Variations.

Responsible person: Chief Executive Officer

Completion date: 31 July 2021

Management comment 2022

Council will review the policy to incorporate delegated authority to the CEO for a limit of variations.

Responsible person: Manager of Governance

Completion date: 31 December 2022

Additional Comments

Council adopted an amended purchasing policy in July 2022 ensuring this item was handled.

5. IT security policy and user access rights

Status in 2022

The finding remains outstanding at the time of the interim audit being undertaken.

Finding in 2021

We noted that the Shire does not have a formal Information Technology (IT) Security Policy. Furthermore, there's no formal process to review user access rights and privileges in the system to ensure they're in line with the responsibilities of individual staff member's roles/positions.

Rating: Moderate
Implication

In the absence of a formal IT Security Policy, management and users will not have guidance as to what constitutes best practice in relation to IT security. The lack of a formal process to review user access rights and privileges to the system increases the risk of unauthorised access to the system which could compromise data integrity.

Recommendation

The Shire should develop a formal IT Security Policy and ensure user access rights are periodically reviewed to ensure they're in line with individual staff roles and responsibilities.

9.7 ASSET MANAGEMENT PLAN (AMP) REVIEW 2022

File Ref: ADM
Author: Codi Brindley-Mullen, Manager of Governance
Authoriser: Raymond Griffiths, Chief Executive Officer
Attachments: Nil

BACKGROUND

Council's September Ordinary Council Meeting – 20th September 2022

MIN 156/22 MOTION - Moved Cr. Forsyth Seconded Cr. Leake

That Council adopt the 2022 Strategic Community Plan 2022-2032 as shown in Attachment A.

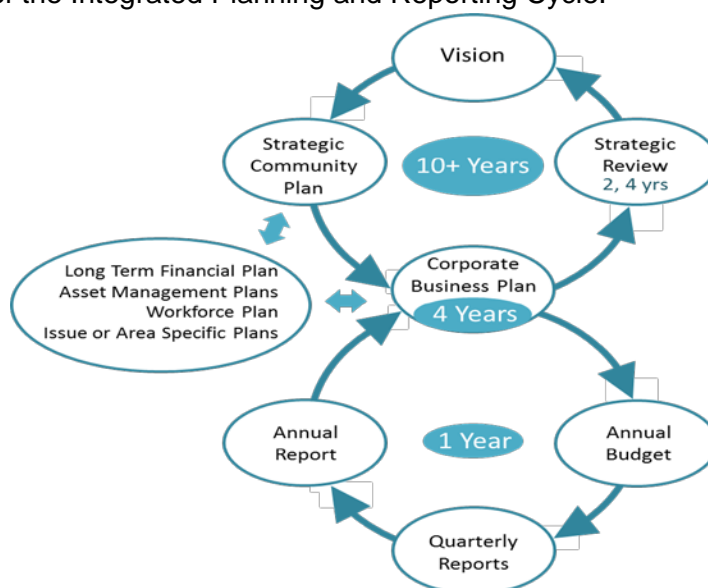

CARRIED 7/0

BY ABSOLUTE MAJORITY

The Asset Management Plan identifies the required asset renewals to maintain and/or increase the Shire's level of service to the community and is therefore an integral part of the Long Term Financial Plan. The plan spans 15 years and a whole of life view is taken to operational, maintenance, renewal and acquisition plans and funding levels, ensuring that assets deliver the required levels of service. Levels of service and risks are considered in the development of operational, maintenance, renewal and acquisition plans and the performance of assets are measured and reported as appropriate.

Under section 5.56 of the Local Government Act 1995 a local government is to have a plan for the future. While this Plan for Future only requires the Community Strategic Plan and the Corporate Business Plan, both Long Term Financial Plans and Asset Management Plans are required to calculate key asset financial ratios which are included as part of the Shire's annual audit process. The core components of the Integrated Planning and Reporting Framework (IPRF) consist of the Strategic Community Plan, Corporate Business Plan, Long Term Financial Plan Asset Management Plans, Workforce plans, Area Specific Plans and the Annual Budget.

Below is an outline of the Integrated Planning and Reporting Cycle.

STAFF COMMENT

The primary purpose of this Asset Management Plan is to ensure that assets provide their required levels of service in the most cost effective manner to cater for both the present and future community. This Asset Management Plan has been prepared to assist Council's long term financial planning and support the delivery of Council services to the community through its infrastructure including buildings, roads, bridges, footpaths, drainage, parks and recreation facilities, airfield and other infrastructure.

The Asset Management Plan covers the period from adoption to 30th June 2035.

The primary objective of this plan is to ensure the current assets owned and operated by the Shire of Kellerberrin are managed in terms of ongoing maintenance, renewal activity and expenditure, such that all desired levels of service are met now and into the future.

Generally speaking, the cost of maintaining an asset decreases with planned maintenance rather than unplanned maintenance, however, excessive planned maintenance increases costs. An objective of asset management is to strategically time infrastructure renewals before unplanned maintenance costs become excessive, but not so soon that assets are renewed before it is really needed. Council's goal in managing assets is to meet the required levels of service in the most cost effective manner for present and future customers.

To achieve this objective, a number of goals have been identified, in line with Council's strategic vision, including:

- the effective management of Council's assets in line with corporate policies, strategies and objectives, statutory and legislative requirements and regulations.
- ensuring that assets are safe, appropriately accessible, well maintained and meet customers' needs in a manner that is sustainable.
- recognising appropriate levels and sources of capital investment required to meet Council's asset renewal and replacement needs.
- maximising the service potential of current assets by ensuring they are used and maintained appropriately.
- achieving better value for money through evaluation processes that consider lifecycle costing.
- minimising Council's exposure to risk as a result of asset failures.

9.8 BUSINESS CONTINUITY AND DISASTER RECOVERY PLAN**File Ref:** ADM**Author:** Codi Brindley-Mullen, Manager of Governance**Authoriser:** Raymond Griffiths, Chief Executive Officer**Attachments:** 1. **REVIEW - Business Continuity and Disaster Recovery Plan (under separate cover)****BACKGROUND**

The Shire of Kellerberrin as with all Local Governments and Businesses are required to have a Business Continuity Plan in place to ensure the continuation of the business during any event that results in disruption to normal operational capability. Business Continuity Management (BCM) is critical to responsible management practice and an important element in the Shire's integrated approach to risk management.

Business Continuity Management deals specifically with business disruption risks.

The Shire of Kellerberrin recognises that some events may exceed the capacity of routine management methods and structure. The policy and Plan aim to provide a mechanism for the development of contingent capacity and plans that will enable management to focus on maintaining and resuming the Shire's most critical functions; whilst working in a planned way toward eventual restoration of operations and ensuring unaffected operations are able to continue.

The document is prepared considering the below;

This document incorporates the Prevention, Preparedness, Response and Recovery (PPRR) framework. Each of the four key elements is represented by a part in the Business Continuity Planning Process.

- **PREVENTION - Risk Management Planning**
 - Incorporates the Prevention element that identifies and manages the likelihood and/or effects of risk associated with an incident.
- **PREPAREDNESS - Business Impact Analysis**
 - Incorporates the Preparedness element that identifies and prioritises the key activities of a business that may be adversely affected by any disruptions.
- **RESPONSE – Incident Response Planning**
 - Incorporates the Response element and outlines immediate actions taken to respond to an incident in terms of containment, control and minimising impacts.
- **RECOVERY - Recovery Planning**
 - Incorporates the Recovery element that outlines actions taken to recover from an incident in order to minimise disruption and recovery times.

State Planning Policy 5.2- Telecommunications infrastructure**5. POLICY MEASURES**

- 5.1 Visual impacts For telecommunications infrastructure to be effective, structures are generally located prominently, at high points in the landscape or on top of buildings, where they are more likely to be visible to the public. The planning authority may exercise discretion in addressing the visual impacts of telecommunications infrastructure. Visual impacts of an infrastructure development proposal should be assessed by applying the following set of policy measures to guide the location, siting and design of the structure;
- 5.1.1 The benefit of improved telecommunications services should be balanced with the visual impact on the surrounding area.
- i. Assessment of the visual impact of development proposals for telecommunications infrastructure should be made on a case by case basis;
 - ii. Telecommunications infrastructure should be sited and designed to minimise visual impact and whenever possible:
 - a. be located where it will not be prominently visible from significant viewing locations such as scenic routes, lookouts and recreation sites;
 - b. be located to avoid detracting from a significant view of a heritage item or place, a landmark, a streetscape, vista or a panorama, whether viewed from public or private land;
 - c. not be located on sites where environmental, cultural heritage, social and visual landscape values maybe compromised and
 - d. display design features, including scale, materials, external colours and finishes that are sympathetic to the surrounding landscape;
 - iii. In addition to the existing exemptions under the Telecommunication Act, local governments should consider exempting telecommunications infrastructure from the requirement for development approval where:
 - a. he infrastructure has a maximum height of 30 metres from finished ground level;
 - b. The proposal complies with the policy measures outlined in this policy; and
 - c. The proponent has undertaken notification of the proposal in a similar manner to 'low impact facilities' as defined and set out in the Mobile Phone Base Station Deployment Industry Code (C564:2011);
 - iv. Telecommunications infrastructure should be located where it will facilitate continuous network coverage and/or improved telecommunications services to the community; and
 - v. Telecommunications infrastructure should be colocated and whenever possible:
 - a. Cables and lines should be located within an existing underground conduit or duct; and
 - b. Overhead lines and towers should be co-located with existing infrastructure and/or within existing infrastructure corridors and/or mounted on existing or proposed buildings. Section 6.3.1 provides guidance on what applicants should submit in support of a development application to assist planning assessment.

SPP 3.7- Bushfire Prone Areas

As no dwellings or outbuildings are proposed as part of this application no BAL assessment is necessary.

STRATEGIC PLAN IMPLICATIONS

COMMUNITY CONSULTATION

PLANNING ASSESSMENT

The proposed development raises no major planning concerns. The location of the tower means the primary purpose of the lot (broad acre agriculture) will not be impacted, as the tower is located on a portion of land that is not used for cropping. The development application outlines that the impact upon vegetation at the site will be minimal as the site is already clear. Furthermore the development is consistent with all other development standards set out in Local Planning Scheme No.4, SPP 3.7 and 5.2. The ability for Crisp wireless to provide improved internet connection to the surrounding area should be seen as a positive. The development complies with all other requirements of the general agriculture zone, including setbacks. It is advised that the application be approved subject to advertising to a nearby landowner.

STAFF RECOMMENDATION

That Council approves the development and use of a 30m telecommunications tower and supporting infrastructure; including one sea container at Lot 13955, Hanlon Road, Kellerberrin, with the following conditions;

State Planning Policy 5.2- Telecommunications infrastructure**5. POLICY MEASURES**

- 5.1 Visual impacts For telecommunications infrastructure to be effective, structures are generally located prominently, at high points in the landscape or on top of buildings, where they are more likely to be visible to the public. The planning authority may exercise discretion in addressing the visual impacts of telecommunications infrastructure. Visual impacts of an infrastructure development proposal should be assessed by applying the following set of policy measures to guide the location, siting and design of the structure;
- 5.1.1 The benefit of improved telecommunications services should be balanced with the visual impact on the surrounding area.
- i. Assessment of the visual impact of development proposals for telecommunications infrastructure should be made on a case by case basis;
 - ii. Telecommunications infrastructure should be sited and designed to minimise visual impact and whenever possible:
 - a. be located where it will not be prominently visible from significant viewing locations such as scenic routes, lookouts and recreation sites;
 - b. be located to avoid detracting from a significant view of a heritage item or place, a landmark, a streetscape, vista or a panorama, whether viewed from public or private land;

 - a. he infrastructure has a maximum height of 30 metres from finished ground level;
 - b. The proposal complies with the policy measures outlined in this policy; and
 - c. The proponent has undertaken notification of the proposal in a similar manner to 'low impact facilities' as defined and set out in the Mobile Phone Base Station Deployment Industry Code (C564:2011);
 - iv. Telecommunications infrastructure should be located where it will facilitate continuous network coverage and/or improved telecommunications services to the community; and
 - v. Telecommunications infrastructure should be colocated and whenever possible:
 - a. Cables and lines should be located within an existing underground conduit or duct; and
 - b. Overhead lines and towers should be co-located with existing infrastructure and/or within existing infrastructure corridors and/or mounted on existing or proposed buildings. Section 6.3.1 provides guidance on what applicants should submit in support of a development application to assist planning assessment.

SPP 3.7- Bushfire Prone Areas

COMMUNITY CONSULTATION

The following consultation took place;

- Chief Executive Officer
- Town Planner
- Heritage and Property Services
- Graham Wardley

PLANNING ASSESSMENT

As the proposed development is located within a heritage place, the application was referred to the Department of Planning, Lands and Heritage. On the 22nd of November, the Shire received the following advice from Adelyn Siew;

Advice: The proposal, in accordance with the plans submitted, is supported subject to the following condition:

To respect the character of the significant fabric, the finishes of the proposed sea container and roofing are to match with the external white colour scheme and unpainted galvanised roofing of the Kellerberrin Fire Station.

The proposed container raises no significant planning concerns as it is believed the screening from Ripper Street is adequate. Furthermore, as advised from the Department of planning, Lands and Heritage, the container shall be painted in a light or white colour to ensure it fits with the existing fire station. It was also advised that the need for a pitched roof on the container be waived. A pitched roof could create a greater need for screening of the container due to its potential unsightly nature.

STAFF RECOMMENDATION

That Council Grants development approval for one 20ft sea container to be located at 4 Ripper Street, Kellerberrin with the following conditions;

General Conditions

- Planning approval will expire if the development is not substantially commenced within two years of this approval;*
- The endorsed approved plans shall not be altered without prior written approval of the Shire;*
- the character of the significant fabric, the finishes of the proposed sea container and roofing are to match with the external white colour scheme and unpainted galvanised roofing of the Kellerberrin Fire Station*
- The Sea Container be fitted with doors that can be opened from the inside to ensure safety of users;*
- Use of the building shall be for domestic purposes only; and*
- The outbuilding shall not be used for human habitation at any given time unless written approval has been granted by the shire.*

Advice Notes

Planning approval is not considered building approval. A building permit shall also be obtained.
